structural molecule activity
structural constituent of ribosome
primary active transmembrane transporter activity
proton transmembrane transporter activity
active monoatomic ion transmembrane transporter activity
electron transfer activity
antioxidant activity
metal cluster binding
peroxidase activity
oxidoreductase activity, acting on peroxide as acceptor
oxidoreduction−driven active transmembrane transporter activity
, acting on paired donors, with incorporation or reduction of molecular oxygen, reduced flavin or flavoprotein as one donor, and incorporation of one atom of oxygen
glutathione transferase activity
glutathione peroxidase activity
proton−transporting ATPase activity, rotational mechanism
arachidonate monooxygenase activity
NADH dehydrogenase (ubiquinone) activity
ATPase−coupled ion transmembrane transporter activity
ATPase activity, coupled to transmembrane movement of ions, rotational mechanism
estrogen 16−alpha−hydroxylase activity
