GO_MF | Stem cell | A1_Het_vs_WT | up in WT | n =
active transmembrane transporter activity
secondary active transmembrane transporter activity
organic acid binding
carboxylic acid binding
lyase activity
carboxylic acid transmembrane transporter activity
ligase activity
hydrolase activity, acting on carbon−nitrogen (but not peptide) bonds
monocarboxylic acid binding
transferase activity, transferring alkyl or aryl (other than methyl) groups
hydrolase activity, acting on carbon−nitrogen (but not peptide) bonds, in linear amides
fatty acid binding
glutathione transferase activity
carbon−carbon lyase activity
lipid transmembrane transporter activity
oligopeptide binding
glutathione binding
carbohydrate kinase activity
intramolecular oxidoreductase activity, transposing C=C bonds
amino acid:sodium symporter activity
