Reactome | Stem cell | A1_Rescue_vs_A1_Het | up in A1_Rescue | n = 12
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Biological oxidations
Metabolism of vitamins and cofactors
Fatty acid metabolism
Drug ADME
Phase II − Conjugation of compounds
Mitochondrial translation
Complex I biogenesis
Mitochondrial translation termination
Mitochondrial ribosome−associated quality control
Phase I − Functionalization of compounds
TP53 Regulates Metabolic Genes
Glutathione conjugation
Complex IV assembly
Arachidonate metabolism
Azathioprine ADME
Aflatoxin activation and detoxification
