Reactome | Stem cell | A1_Rescue_vs_KO | up in A1_Rescue | n = 1617
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Biological oxidations
Drug ADME
Ion channel transport
Anchoring of the basal body to the plasma membrane
Complex I biogenesis
AURKA Activation by TPX2
Phase II − Conjugation of compounds
Transferrin endocytosis and recycling
Aspirin ADME
ROS and RNS production in phagocytes
Insulin receptor recycling
Xenobiotics
Prednisone ADME
Atorvastatin ADME
