GO_BP | Stem cell | KO_vs_WT | up in WT | n = 1516
generation of precursor metabolites and energy
fatty acid metabolic process
small molecule catabolic process
response to xenobiotic stimulus
organic acid biosynthetic process
carboxylic acid biosynthetic process
response to metal ion
steroid metabolic process
lipid catabolic process
response to starvation
response to toxic substance
organic acid catabolic process
carboxylic acid catabolic process
oxidative phosphorylation
electron transport chain
cellular response to xenobiotic stimulus
respiratory electron transport chain
detoxification
cholesterol efflux
detoxification of inorganic compound
