KEGG | Stem cell | KO_vs_WT | up in WT | n = 1516
Amyotrophic lateral sclerosis
Huntington disease
Chemical carcinogenesis − reactive oxygen species
Thermogenesis
Prion disease
Non−alcoholic fatty liver disease
Diabetic cardiomyopathy
Chemical carcinogenesis − receptor activation
Oxidative phosphorylation
Chemical carcinogenesis − DNA adducts
Retinol metabolism
Drug metabolism − other enzymes
PPAR signaling pathway
Metabolism of xenobiotics by cytochrome P450
Steroid hormone biosynthesis
Drug metabolism − cytochrome P450
Mineral absorption
ABC transporters
Porphyrin metabolism
Ascorbate and aldarate metabolism
