cell projection assembly
plasma membrane bounded cell projection assembly
morphogenesis of an epithelium
cilium organization
cilium assembly
wound healing
skin development
actin filament bundle assembly
positive regulation of plasma membrane bounded cell projection assembly
regulation of wound healing
regulation of actomyosin structure organization
regulation of actin filament bundle assembly
regulation of stress fiber assembly
alternative mRNA splicing, via spliceosome
molting cycle process
hair follicle development
hair cycle process
intraciliary transport
gamma−delta T cell activation
