GO_BP | TA | A1_Het_vs_WT | up in WT | n = 2044
small molecule biosynthetic process
response to nutrient levels
regulation of hormone levels
carbohydrate metabolic process
response to peptide hormone
fatty acid metabolic process
generation of precursor metabolites and energy
lipid localization
lipid transport
small molecule catabolic process
response to xenobiotic stimulus
carboxylic acid biosynthetic process
import across plasma membrane
hormone metabolic process
pyridine−containing compound metabolic process
nicotinamide nucleotide metabolic process
modified amino acid metabolic process
carbohydrate catabolic process
olefinic compound metabolic process
cellular response to xenobiotic stimulus
