GO_MF | TA | A1_Het_vs_WT | up in WT
active transmembrane transporter activity
nucleoside−triphosphatase regulator activity
GTPase regulator activity
secondary active transmembrane transporter activity
carbohydrate binding
organic acid binding
carboxylic acid binding
lipid transporter activity
oxidoreductase activity, acting on paired donors, with incorporation or reduction of molecular oxygen
carboxylic acid transmembrane transporter activity
vitamin binding
antiporter activity
modified amino acid binding
monosaccharide binding
vitamin B6 binding
pyridoxal phosphate binding
ABC−type transporter activity
glutathione transferase activity
oligopeptide binding
glutathione binding
