Reactome | TA | A1_Het_vs_WT | up in WT | n = 2044
Metabolism of lipids
Transport of small molecules
Metabolism of carbohydrates and carbohydrate derivatives
Biological oxidations
SLC−mediated transmembrane transport
Fatty acid metabolism
Metabolism of water−soluble vitamins and cofactors
Phase I − Functionalization of compounds
Drug ADME
Cytochrome P450 − arranged by substrate type
Arachidonate metabolism
Glutathione conjugation
Aspirin ADME
Xenobiotics
Biosynthesis of specialized proresolving mediators (SPMs)
Biosynthesis of DHA−derived SPMs
Miscellaneous substrates
Digestion and absorption
Recycling of bile acids and salts
Atorvastatin ADME
