Reactome | TA | A1_Rescue_vs_A1_Het | up in A1_Rescue | n = 1580
Aerobic respiration and respiratory electron transport
Respiratory electron transport
Biological oxidations
Fatty acid metabolism
Drug ADME
Phase II − Conjugation of compounds
Complex I biogenesis
Phase I − Functionalization of compounds
Cytoprotection by HMOX1
Glutathione conjugation
Cytochrome P450 − arranged by substrate type
Complex IV assembly
Aspirin ADME
Paracetamol ADME
Aflatoxin activation and detoxification
Xenobiotics
Heme degradation
Biosynthesis of DHA−derived SPMs
Miscellaneous substrates
Atorvastatin ADME
