active transmembrane transporter activity
oxidoreductase activity, acting on paired donors, with incorporation or reduction of molecular oxygen
iron ion binding
carboxylic acid transmembrane transporter activity
proton transmembrane transporter activity
primary active transmembrane transporter activity
tetrapyrrole binding
heme binding
structural constituent of ribosome
active monoatomic ion transmembrane transporter activity
fatty acid binding
electron transfer activity
copper ion binding
, acting on paired donors, with incorporation or reduction of molecular oxygen, reduced flavin or flavoprotein as one donor, and incorporation of one atom of oxygen
glutathione transferase activity
2 iron, 2 sulfur cluster binding
steroid hydroxylase activity
arachidonate monooxygenase activity
arachidonate epoxygenase activity
retinoic acid 4−hydroxylase activity
