GO_BP | TA | KO_vs_WT | up in WT | n = 2179
response to nutrient levels
fatty acid metabolic process
generation of precursor metabolites and energy
lipid localization
lipid transport
energy derivation by oxidation of organic compounds
organic anion transport
response to xenobiotic stimulus
lipid catabolic process
organic acid transport
carboxylic acid transport
steroid metabolic process
aerobic respiration
hormone metabolic process
lipid homeostasis
olefinic compound metabolic process
cellular response to xenobiotic stimulus
long−chain fatty acid metabolic process
xenobiotic metabolic process
xenobiotic catabolic process
