Reactome | TA | KO_vs_WT | up in WT | n = 2179
Transport of small molecules
Metabolism of lipids
Biological oxidations
SLC−mediated transmembrane transport
Fatty acid metabolism
Respiratory electron transport
Phase I − Functionalization of compounds
Drug ADME
Mitochondrial protein degradation
Phase II − Conjugation of compounds
Plasma lipoprotein assembly, remodeling, and clearance
Nuclear Receptor transcription pathway
Glutathione conjugation
Cytoprotection by HMOX1
Arachidonate metabolism
Plasma lipoprotein remodeling
